

Sage 100 Contractor: Sage Tips & Tricks and Advanced Accounting

Maybe the original bookkeeper was trained by someone a long time ago. The bookkeeper quit and then trained someone else who trained someone else who then left and handed the books over to you. Or, your boss handed you the program and said “learn it!” Not knowing all of the correct ways, or proper shortcuts, can make your job so much harder than it should be. Join us for this webinar where we will review the processes of running the books of a contractor using Sage 100 Contractor.

What should a controller be doing in Sage? Whether you have a bookkeeper or fill both the roll of bookkeeper and controller, learn what a good controller would need to do. What reports should you run? Do you have checklists? How are you determining profitability?

But besides answers to the accounting questions, there are lots of other tips and tricks that the power user can use to make your work easier, faster and more efficient.

Agenda

- Accounting
- Accounts Receivable
- Accounts Payable
- Payroll
- Project Management
- Utilities

The price of this recorded webinar is \$350. This includes 4 one-hour recordings plus a PDF of the material. For more information or a registration form, please email Leslie@ShinerGroup.com
